Electronics

Microcontrollers

Michał Wojciechowski

I am an ambitious and energetic engineering graduate. I am currently studying at Wroclaw University of Technology at the master's level. Throughout my studies I was involved in the projects and life of the Student Government and Academic Radio Luz. Through my activities, I acquired the skills to work in a group, perform unusual tasks and develop promotional and graphic materials. During my engineering studies, I acquired skills in designing and programming controllers, robots and other electrical devices. I am looking for a job that will allow me to develop my skills in programming. I am determined to achieve goals, creative and excellent at teamwork.
